

# FOR IMMEDIATE RELEASE

## CharterOak Acoustics Broadens Product Line With New Headphones and Pop Filters

**Enfield, Connecticut USA (September 12, 2007)** CharterOak Acoustic Devices, manufacturers of hi-quality, hand assembled audio equipment has expanded product offerings to include Headphones and Pop Filter lines. The SP-1 Stereo Headphone and PF-1 and PF-2 Handmade Pop Filters will debut in the US for the first time at the upcoming AES Convention in New York City (Booth 465).

The CharterOak Studio Phone I (SP-1) is an acoustically closed headphone for studio use and music production built exclusively for CharterOak by German manufacturer MB Quart. The CharterOak SP-1 Headphones unique features include: Five-dimensional "CARDAMATIC" ear cup suspension ensuring a comfortable, individual fit regardless of head size and prevent body noise effects from infiltrating the ear cups; comfortable, "Gentle to the skin" hygienic ear pads provide excellent insulation from outside noise without affecting wearer comfort over long periods of time; high-quality drivers featuring ultra-light sandwich diaphragms and copper-plated aluminum voice coils; good rejection of outside noise, extended frequency response and perfect detail. All of these features make the SP-1 appropriate for overdubbing and mixing.

CharterOak PF-1 & PF-2 Handmade Pop Filters outperform other pop filters in three key areas. The SaatiTech Hyphobe Acoustex™ fiber used in the construction is extremely effective in repelling moisture, thus keeping damaging moisture away from the microphone capsule. Secondly, the B010Acoustex™ used will stop plosives without compromising the frequency response of the microphone. Standard Nylon pop filters are incapable of this level of performance. Lastly, the CharterOak PF-1 and PF-2 are designed to eliminate the need for bulky mic-clip/gooseneck apparatuses as well as secondary mic-stands, as the filter comes attached to a Velcro™ strap which will fit most side-address large diaphragm microphones, and makes the PF-1 and PF-2 unobtrusive and easy to install.

The SP-1 Headphone, PF-1 and PF-2 Pop Filters can be seen at booth #465 at the upcoming AES Convention in NYC. Visitors who audition the headphones at the show will be entered to win a free pair of headphones and a PF-1.
