CharterOak Acoustic Devices New Product Announcement, M900T

ENFIELD, CT – (April 8, 2008) - CharterOak Acoustic Devices, manufacturers of hand assembled pro audio equipment announced today the release of the M900T Small Diaphragm Vacuum Tube Condenser.

The CharterOak M900-T will be on display for the first time at the Amsterdam AES Show next month. The front address M900T employs the same cardioid, hyper-cardioid, and omni capsules used with popular M900 Transformerless Small Diaphragm Condenser. However, the M900-T combines these capsules with a vacuum tube head amplifier, and US made Cinemag output transformer creating a small diaphragm condenser with the robust and musical sound for that all CharterOak microphones are known for.

The M900T features a two-step sensitivity switch (0db and -15db) and 75 Hz bass roll off (6dB per octave), both of these features enhancing the functionality and versatility of this beautiful sounding microphone. Additionally, the microphone will ship in a metal flight case and includes 3 capsules, Gotham Audio Cables, power supply, shock mount and mic clip for \$1299.

The M900T exhibits the same simplicity of design, rigid build quality and robust sound that is present in all CharterOak microphones and it is backed with the same lifetime guarantee, making it a welcome addition to any microphone collection.

CharterOak has remained dedicated to providing outstanding sound, build quality, and unmatched customer service and technical support. The company's founder, a recording engineer and producer with 20 years experience, maintains his vision to provide the level of quality and service that he always wanted to receive as an end user. From this vision, CharterOak developed **Adapt(SM)** *Create Your Own Classic* microphone customization service, Tips & Tricks posted online, 7-day phone and web support to assist in matching the correct microphone with the correct application and a Lifetime Guarantee against manufacturing defects on all CharterOak products.
