

For Immediate Release:

## CharterOak Acoustic Devices Gears Up To Release Three New Products at AES Amsterdam

ENFIELD, CT – (March 18, 2008) - CharterOak Acoustic Devices gears up to release three new products at the 2008 Audio Engineering Society Show in Amsterdam. Due to be on display for the first time is the M900-T, SCL-1, and the Small Studio Collection.

The CharterOak SCL-1 Solid State Compressor/Limiter will be released under the CharterOak Entertainment Group brand. The proprietary unit made by CharterOak Entertainment Group for its subsidiary studio and multimedia companies Studio.45, and CharterOak Multimedia will begin shipping in June of 2008. The unit employs all discreet electronics and is capable of providing a constant output level regardless of input level or frequency, without the familiar pumping inherent in most compressor/limiters. The unit delivers extremely fast attack times without overcompensation, and a release characteristic, which is a function of dynamic range and average program level.

The M900-T employs the same cardioid, hyper-cardioid, and omni capsules used with popular M900 Transformerless Small Diaphragm Condenser. However, the M900-T combines these capsules with a vacuum tube head amplifier and custom output transformer.

The CharterOak Small Studio Collection is the total microphone solution for small recording studios with a tight budget. Consisting of a critics favorite, the SA538 Large Diaphragm Condenser, the E700 Solid State condenser and a sequentially numbered matched pair of M900s, start up and well established studios will benefit from this full spectrum selection of microphones and will be able to tackle any recording situation from vocals to orchestra to loud electric guitars. This collection is all you need and is delivered in a solid locking flight case with all of the necessary accessories and CharterOak's Lifetime Warranty.

CharterOak has remained dedicated to providing outstanding sound, build quality, and unmatched customer service and technical support. The company's founder, a recording engineer and producer with 20 years experience, maintains his vision to provide the level of quality and service that he always wanted to receive as an end user. From this vision, CharterOak developed **Adapt(SM)** – *Create Your Own Classic* microphone customization service, Tips & Tricks posted online, 7-day phone and web support to assist in matching the correct microphone with the correct application and a Lifetime Guarantee against manufacturing defects on all CharterOak products.
